

Southern Illinois Center Evacuation Plan

Fire: In case of a fire, an alarm will sound. You should move to the nearest Exit and move away from the building. Exits are located at the front and rear of the building and at each corner of the building.

IF YOU ARE CAUGHT IN SMOKE WHILE LEAVING:

1. Get low to the floor (the cleanest air is usually found at door knob height or lower).
2. Take short breaths through the nose, until you reach safety.
3. Try to remain calm and think before you move.

WHEN BLOOD OR ANY OTHER BODY FLUID IS PRESENT, REGARDLESS OF WHETHER IT IS A MAJOR OR MINOR INCIDENT, TAKE THE FOLLOWING PRECAUTIONS:

1. Keep all individuals away from the area containing blood or body fluids.
2. Contact the Custodian or Building Manager to seal off the area.

TORNADO: If there is a threat of a Tornado, please move to the restrooms located in the front of the building and the offices in the rear of the building.
